

Specifications for Display Advertisement at Sme.sk - standard formats

valid from 1.6.2015

Format name (dimensions in pixels)	Preview link	Important notices
1000x100+2*160x600	Gate	Accepted types of files for standard display advertisement: *.swf, *.jpg, *.gif*, *.png. Specific dimensions and data volumes for specific formats available in Price List for banner advertising at Sme.sk at http://inzercia.sme.sk . SWF banners: in the GET URL item you must fill in the clickthru, set the open-in-a-new-window option, i.e. chose the _blank item and check expression on clickthru. The Flash creatives must comply with the required background and status when "wmode = transparent". Maximum animation length 15 seconds. Audio: first time after loading it is launched w/o audio, then, after each interaction from the user, also w/ audio, the stop/play, audio off/on controls). Video (Rich media formats): Each video ad, including when displayed over the page content (layer) must contain a set of standard control features, including STOP, PLAY, PAUSE. If any (rich media) format contains a video, then the (video) file intended for download shall not exceed the data limit of 2,2 MB. Maximum frame rate 24 fps. Important recommendations: For the case when the browser does not support user functionality creatives (eg. Flash) - with a support simultaneous delivery fallback image (recommended to use standard image file). Maximum allowable load of the user CPU banner creative: 30%.
